

NEW ENGLAND CLEAN ENERGY

FACT CHECK

FACT: New England Clean Energy Corridor (NECEC) will bring cleaner energy straight to Maine

\$140 Million

The NECEC will provide \$140 million in direct electric rate relief to Mainers.

\$350 million

The NECEC will also reduce wholesale electricity prices by more than \$350 million over the next 15 years.

\$50 million

The NECEC has committed \$50 million for helping low-income customers in Maine reduce their energy bills.

70,000 homes

The NECEC will transmit vast amounts of renewable energy onto the New England electrical grid in Lewiston, with Maine consumers receiving enough energy from the line to power nearly 70,000 homes.

Why should we continue to rely on untrustworthy, out-of-state oil and gas companies to power our homes? Mainers deserve better. Renewable hydro-electric power is more reliable and more in line with Maine's values.

Maine has the opportunity to create high-paying local jobs by importing clean, renewable hydro-electric power from our neighbor to the north. The New England Clean Energy Corridor (NECEC) directly benefits Mainers by expanding broadband access in Western Maine and by lowering wholesale electric costs throughout the state.
